# CSCI 6040 Final Project Reproducibility Report

Amy Wightman dunphya20@students.ecu.edu

James Rosebaugh-Nordan rosebaughnordanj20@students.ecu.edu

Connor Bullard bullardc21@students.ecu.edu

## I. INTRODUCTION

### II. SCOPE OF REPRODUCIBILITY

#### III. METHODOLOGY

- A. Model
- B. Datasets
- C. Hyperparameters
- D. Implementation
- E. Experimental Setup
- F. Computational Requirements

IV. RESULTS

V. DISCUSSION

- A. What Was Simple
- B. What Was Difficult
- C. Recommendations for Reproducibility
- D. Communication with Author(s)

We were fortunate with our selection of the paper to study in that the author was readily available for communication. At several times throughout the semester we had contact with Erik Körner to either request assistance or clarification on a matter or to report a potential issue we encountered.
